

JOIN THE BIOBASED INNOVATION STUDENT CHALLENGE EUROPE

Do you want to design a creative bio-based solution in a multidisciplinary student team? The Bio-based Innovation Student Challenge Europe (BISC-E) encourages students to explore the emerging bio-based work field while developing a new bio-based product or process. Are you up or the challenge? Register now!

2022

THE CHALLENGE

All teams develop a bio-based innovation (product or process) and present their ideas to a jury of experts from industry and science. The presentation has to be accompanied by a few supporting documents explaining sustainability, technical feasibility and economic viability of your innovation.

FOR WHO?

The challenge is open for students enrolled in a programme at a Portuguese Higher Education Institution, either in the final year of a Bachelor's degree or in a Bachelor or Masters programme at the moment of registration. Due to the multidisciplinary character of the challenge it is recommended to embody multiple disciplines in your team, of which exact science should be one. Team members can come from different institutions.

EVERYBODY WINS!

Participating in BISC-E will give you valuable experience in the emerging bio-based work field, in developing a new product or process with all its aspects and in presenting innovative ideas for a panel of experts.

27 May 2022
6 June 2022

8 July 2022

25 July 2022

Autumn 2021

Registration deadline
Kick-off with all participants
Submission of the business cases' presentation and supporting documents
Presentation and national final
EU final (timing, location and details to be announced by BIC)
